06/2020

Dear Parents/Caregivers,

As the weather starts to cool off a bit in the mornings, we are still faced with pretty warm days. Although the mornings are a bit cooler, they are still quite manageable.

We would suggest that it is not yet time to buy any winter uniform (jerseys or jackets.) Where possible, leave these until the start of the second term.

If children are feeling a bit colder in the morning, they can always wear their Kids Can 'Warriors' raincoats, which also give a little bit of warmth.

Of course, whenever we talk of jackets, raincoats or jerseys, the next thing we say is:

Always name your child's clothing, especially the clothes they might take off at school.

It's not a guarantee, but it sure helps.

**Proud to be a major sponsor
of Everglade Primary School.**

If you haven't seen the progress of the Artificial Turf project, here is a photo taken today. We are looking forward to seeing the project completed, and this fresh new space available for school activity.

We have had a few newer people find that they have parked in the school parking area, **and then got caught inside when the gates have closed.**

Our first consideration is student safety. As a result, we have the gates set to close when foot traffic is heaviest. This is from:

- 8.30 am to 9.00 am each morning
- 2.50 pm to 3.15 pm each afternoon

If you came in to drop your child off, then decide to go with them to their classroom, you may find when you return to your car that the gates have closed. If you are planning to catch up with your child's teacher, it is a good idea to park outside the gates.

This time of year is often associated with head lice. They love children's hair, and the cleaner the hair, the more they love it.

Do yourself a favor, and check your children's hair regularly. If your child does have head lice, please tell us. We have some hair shampoo that we can provide.

Writers' Piece

We thank Room 22 for this contribution to our newsletter.

Room 22 has been writing about their favourite body parts, and finding fun facts about them.

What part of your body is your favourite? Mine is the brain. My brain is precious like a gem. Everytime it finds some information it becomes stronger like a muscle. It stores memories, learning and all types of things. It's like a million files at the back of my head.

My brain is technically one of the most important parts of my body. I like the brain because it stores memories which help me remember the past times that were fantastically fun.

Listen to these fun facts...these are so interesting.

Did you know a fully grown brain weighs about 3kgs?

About 75 percent of your brain is water, so keep drinking water!

Successful brain surgeries date back to the Stone Age!

Enara

My favourite body part is my heart because my heart beats 60 to 90 beats per minute! Fun fact: your heart swishes your blood when you breath and your heart and lungs work together to make sure your body has oxygen. I love my heart because it keeps me alive.

Addison

The best thing about me is my eyes. My eyes are the best thing because if I didn't have eyes as soon as I ran I would fall over and hurt myself. Here are some facts about eyes... your eyes blink about 4,200,000 times a year. Your eyes can focus on 50 different objects every minute and they can see millions of colours too.

My eyes are my favourite part of my body because they look like my mums, that's why I like them so much!

Bronson

The best thing about me is my brain because it is the centre of my entire body. My brain helps me talk. My brain is one of the largest and most complex organs in my body. My brain is the smartest thing in my body, it helps me remember!

Zachariah

Monday 2nd of March the travel wise team used speed guns

The total number of speed were
163 and the highest speed was
50 and the lowest was 16 and
the speeds added altogether
were 4603.

The average speed was around
28-29 that's a good speed because
when the lights flash the speed
changes into 40 but when it doesn't
it's 50.

The number of speed over
the limits was 6 but if you
put in percentages it's
3-4/100%
